Women's Program

The Women's Program is funded by a generous grant from the Illinois Breast and Cervical Cancer Program (IBCCP) and Susan G. Komen Chicagoland. This program provides free screening services for breast and cervical cancer in order to reduce mortality to eligible women. Even if a woman has already been diagnosed with cancer, she may be qualified to receive free treatment. You may be able to receive free services if you are a woman: living in Illinois, without insurance, 35 to 64 years old, (younger women may be eligible in some cases).

In YR 2018 we screened over 873 women, provided 705 mammograms, 169 diagnostic mammograms, 197 pap smears and 29 breast biopsies. Five breast cancers were detected and referrals were made for treatment.
